

**TERMINAL AND AN ASSOCIATED SYSTEM, METHOD AND  
COMPUTER PROGRAM PRODUCT FOR OBTAINING THE  
TERMINAL LOCATION BASED UPON CONNECTIONS OF THE  
TERMINAL**

5

**ABSTRACT OF THE DISCLOSURE**

A system, method and computer program product are provided for obtaining a terminal location based upon connections of the terminal. The terminal includes a controller, and may additionally include a display. The controller is capable of  
10 establishing, and thereafter terminating, at least one defined connection, such as at least one defined communication and/or logical connection. The controller is also capable of monitoring the terminal for establishment of a defined connection, and for subsequent termination of the defined connection. Upon establishment and/or termination of the defined connection, then, the controller is capable of being triggered to obtain a location  
15 of the terminal. In turn, the display can be capable of presenting the location of the terminal.
